AGENDA

1. CALL TO ORDER AND ROLL CALL

2. PROOF OF PUBLICATION

3. CONSENT AGENDA
   A. March 14, 2023 Meeting Minutes

4. PRESENTATION ITEMS
   A. Functional Classification Review Process
      A presentation by FDOT on the upcoming local government review process
   B. Draft 2023 List of Priority Projects (LOPP)
      A presentation by staff of the draft project lists

5. DISCUSSION ITEMS
   A. Congestion Management Process (CMP), State of System Update
      A discussion by staff on a Scope of Services for an update to the CMP
   B. TPO Safety Tools Project
      A discussion by staff on a Scope of Services for a safety dashboard and annual report

6. COMMENTS BY FDOT
   A. Construction Report

7. COMMENTS BY TPO STAFF

8. COMMENTS BY TAC MEMBERS

9. PUBLIC COMMENT (Limited to 2 minutes)

10. ADJOURNMENT

All meetings are open to the public, the TPO does not discriminate on the basis of race, color, national origin, sex, age, religion, disability and family status. Anyone requiring special assistance under the Americans with Disabilities Act (ADA), or requiring language assistance (free of charge) should contact Liz Mitchell, Title VI/Nondiscrimination Coordinator at (352) 438-2634 or liz.mitchell@marioncountyfl.org forty-eight (48) hours in advance, so proper accommodations can be made.
Pursuant to Chapter 286.0105, Florida Statutes, please be advised that if any person wishes to appeal any decision made by the Board with respect to any matter considered at the above meeting, they will need a record of the proceedings, and that, for such purpose, they may need to ensure that a verbatim record of the proceedings is made, which record includes the testimony and evidence upon which the appeal is to be based.

*The next regular meeting of the Joint Citizens Advisory Committee and Technical Advisory Committee will be held on May 9, 2023*
Technical Advisory Committee (TAC) Meeting
Marion County – Library Headquarters, Meeting Room B
2720 E. Silver Springs Blvd., Ocala, FL 34470
3:30 PM

MINUTES

Members Present:

Ji Li
Bob Titterington
Kenneth Odom
Mickey Thomason
Noel Cooper
Loretta Shaffer (Jessica Heller attended as alternate)
Eric Smith
Rakinya Hinson

Members Not Present:

Dave Herlihy
Elton Holland

Others Present:

Rob Balmes
Shakayla Irby
Item 1. Call to Order and Roll Call

Chairman Kenneth Odom called the meeting to order at 3:32pm and Secretary Shakayla Irby called the roll. There was a quorum present.

Item 2. Proof of Publication

Secretary Shakayla Irby stated the meeting had been published online to the TPO’s website, as well as the City of Ocala, Belleview, Marion County, and Dunnellon’s websites on March 7, 2023. The meeting had also been published to the TPOs Facebook and Twitter pages.

Item 3. Consent Agenda

Mr. Thomason made a motion to approve the Consent Agenda. Mr. Cooper seconded, and the motion passed unanimously.

Item 4a. Fiscal Years (FY) 2023 to 2027 Transportation Improvement Program (TIP) Amendment #5

Mr. Balmes presented to the committee and said that per the request of the Florida Department of Transportation (FDOT), two projects were proposed to be amended in the Fiscal Years (FY) 2023 to 2027 Transportation Improvement Program (TIP).

The projects (FM#443623-1, #443624-1) had received federal highway planning grant funding to support activities of the I-75 Master Plan. The types of work the funding would support included community engagement, alternative concept identification and traffic analysis and modeling.

The projects would also assist future project phases as the Master Plan identified specific projects and segments moving forward into the Project Development and Environment (PD&E) phase.

FM# 443623-1: I-75 (SR 93) from Turnpike (SR 91) to SR 200
  - Length: 22.50 miles
  - Funding: $2,500,000 (Federal)
  - FY 2023, PLN Phase
  - Total TIP Funding: $2,500,000

FM# 443624-1: I-75 (SR 93) from SR 200 to CR 234
  - Length: 25.28 miles
  - Funding: $1,783,543 (Federal)
  - FY 2023, PLN Phase
  - Total TIP Funding: $1,783,543

Chairman Odom asked when the public involvement meetings would be taking place.

Ms. Rakinya Hinson with FDOT said there were no updates on a meeting schedule at the time but would keep the committee informed as information became available.
Mr. Cooper made a motion to approve the FY 2023 to 2027 TIP Amendment #5. Mr. Thomason seconded, and the motion passed unanimously.

**Item 4b. Performance Management 2023 Pavement and Bridge (PM2), System Performance (PM3) Targets**

Mr. Balmes presented and said that Federal law required State DOTs and TPOs/MPOs to conduct performance-based planning by setting data-driven targets linked to specific measures.

In 2017, the Federal Highway Administration (FHWA) published the Pavement and Bridge Condition Performance Measures (PM2) and the System Performance Measures (PM3) Final Rules. The rules established performance measures to assess conditions and reliability for the National Highway System (NHS).

On December 16, 2022, the Florida Department of Transportation (FDOT) established new statewide two and four-year targets for Pavement and Bridge condition and System Performance. As a result, all MPO/TPO’s in Florida were required to set targets, with the option to support the FDOT statewide targets or establish specific targets for their planning areas.

Targets had to be adopted by the TPO Board no later than June 14, 2023. The TPO was required to include the respective targets and annual results in the Transportation Improvement Program (TIP) and Long-Range Transportation Plan (LRTP).

Mr. Balmes explained the Pavement and Bridge (PM2).

The PM2 measures represented the percentage of lane-miles on the Interstate and non-Interstate NHS pavement and bridges (by deck area) that were in good or poor condition.

FHWA set a threshold for each metric to establish good, fair, or poor condition. Pavement sections that were not good or poor would be classified as fair. Bridges are classified as either good or poor.

The following charts were provided to display the new Pavement and Bridge performance measures and respective targets set by FDOT on December 16, 2022.

### PM2: State Pavement and Bridge Performance Measures and Targets

<table>
<thead>
<tr>
<th>Pavement Condition</th>
<th>2023 Target</th>
<th>2025 Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percent of Interstate pavements in Good condition</td>
<td>60.0%</td>
<td>60.0%</td>
</tr>
<tr>
<td>Percent of Interstate pavements in Poor condition</td>
<td>5.0%</td>
<td>5.0%</td>
</tr>
<tr>
<td>Percent of Non-interstate NHS pavements in Good condition</td>
<td>40.0%</td>
<td>40.0%</td>
</tr>
<tr>
<td>Percent of Non-interstate NHS pavements in Poor condition</td>
<td>5.0%</td>
<td>5.0%</td>
</tr>
</tbody>
</table>

### Bridge Condition

<table>
<thead>
<tr>
<th>Bridge Condition</th>
<th>2023 Target</th>
<th>2025 Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percent of National Highway System (NHS) bridges classified as in Good condition by deck area</td>
<td>50.0%</td>
<td>50.0%</td>
</tr>
<tr>
<td>Percent of National Highway System (NHS) bridges classified as in Poor condition by deck area</td>
<td>10.0%</td>
<td>10.0%</td>
</tr>
</tbody>
</table>
Mr. Balmes explained the System Performance (PM3).

The PM3 measures represented the percentage of miles traveled on the Interstate and non-Interstate NHS that are reliable for all vehicles, and a specific measure for truck reliability. Travel time reliability compared to the worst travel times on a road against the travel time that was typically experienced.

In general, road miles with a ratio of less than 1.5 were considered reliable.

The following charts were provided to the new System Performance measures and respective targets set by FDOT on December 16, 2022.

### PM3: System Performance Measures and Targets

<table>
<thead>
<tr>
<th>System Performance</th>
<th>2023 Target</th>
<th>2025 Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percent of Person-Miles Traveled on the Interstate that are Reliable</td>
<td>75.0%</td>
<td>70.0%</td>
</tr>
<tr>
<td>Percent of Person-Miles Traveled on the Non-Interstate National Highway System (NHS) that are Reliable</td>
<td>50.0%</td>
<td>50.0%</td>
</tr>
<tr>
<td>Truck Travel Time Reliability (TTTR) Index</td>
<td>1.75</td>
<td>2.0</td>
</tr>
</tbody>
</table>

Two options were available:

A. Support the FDOT statewide two and four-year targets for Pavement and Bridge and System Performance

B. Establish two and four-year targets specific to the TPO Planning area for Pavement and Bridge and System Performance

Mr. Balmes mentioned that the last cycle when targets were required to be set by FDOT in 2018, all MPO/TPOs in Florida agreed to support the statewide targets.

The PM2: State Pavement and Bridge Performance Measures, Targets and TPO Results were provided.

### PM2: State Pavement and Bridge Performance Measures, Targets and TPO Results

#### Pavement Condition

<table>
<thead>
<tr>
<th>Pavement Condition</th>
<th>2023 Target</th>
<th>2025 Target</th>
<th>TPO Target Results (2021)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percent of Interstate pavements in Good condition</td>
<td>50.0%</td>
<td>60.0%</td>
<td>64.0%</td>
</tr>
<tr>
<td>Percent of Interstate pavements in Poor condition</td>
<td>5.0%</td>
<td>5.0%</td>
<td>0.0%</td>
</tr>
<tr>
<td>Percent of Non-Interstate NHS pavements in Good condition</td>
<td>40.0%</td>
<td>40.0%</td>
<td>51.5%</td>
</tr>
<tr>
<td>Percent of Non-Interstate NHS pavements in Poor condition</td>
<td>5.0%</td>
<td>5.0%</td>
<td>0.3%</td>
</tr>
</tbody>
</table>

#### Bridge Condition

<table>
<thead>
<tr>
<th>Bridge Condition</th>
<th>2023 Target</th>
<th>2025 Target</th>
<th>TPO Target Results (2021)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Percent of National Highway System (NHS) bridges classified as in Good condition by deck area</td>
<td>50.0%</td>
<td>50.0%</td>
<td>59.2%</td>
</tr>
<tr>
<td>Percent of National Highway System (NHS) bridges classified as in Poor condition by deck area</td>
<td>10.0%</td>
<td>10.0%</td>
<td>0.0%</td>
</tr>
</tbody>
</table>
Ms. Rakinya Hinson with FDOT made a comment regarding the 100% reliability of the Interstate and said she would add the term “reliably congested”. The targets were telling that even though congestion was not desirable as travelers there was however a reliability that the Interstate would be congested. Also, travel times may vary depending on the amount of congestion on different days of the week.

Mr. Thomason made a motion to accept Option A: Support the FDOT statewide two and four-year targets for Pavement and Bridge and System Performance. Mr. Cooper seconded, and the motion passed unanimously.

**Item 5a. Santos to Baseline Trail Project**

Mr. Thomason said the Santos to Baseline Trail project (Paved Trail Connector between Santos Trailhead and the west side of 441) had been a high priority of the TPO for many years.

In preparation for the upcoming List of Priority Projects (LOPP) process, Mr. Thomason wanted the project to be discussed at the meeting.

Mr. Thomason talked about some of the challenges that had been faced with the project and said that the project could be resubmitted for SunTrail or a new separate application would have to be submitted if the original plans for the project were revisited.

The committee engaged in discussion.

Chairman Odom made a comment that he would stay with a safe route and close the gap at another time because he did not anticipate the tracks being there forever.

After discussions, the committee was in support of the current delineation of the trails.

**Item 5b. FDOT Strategic Intermodal System (SIS) Letter**

Mr. Balmes said that every five years, the Florida Department of Transportation (FDOT) District 5 coordinated with Central Office to complete a series of Strategic Intermodal System (SIS) planning documents which included three tiers or lists of future capacity improvement projects. The SIS lists contained projects programmed (FY 2024-2028), planned to be funded (FY 2029-2033), and considered financially feasible based on projected State revenues (FY 2033-2050).
On January 27, the FDOT District 5 submitted a set of draft SIS project lists to the TPO and requested comments as soon as possible. A follow-up virtual overview meeting was requested with the TPO Director and TPO Chair on February 8. FDOT District 5 staff explained they required to submit comments to Central Office no later than February 28.

Based on the limited timeframe for reviewing and submitting comments to District 5, TPO Chairman Curry requested a meeting with staff representatives of the Cities of Belleview, Dunnellon, Ocala and Marion County to coordinate and submit one set of comments. A coordination meeting was held on February 15, 2023 at the Marion County Office of County Engineer and included: Rob Balmes, TPO; Elton Holland, Marion County; Sean Lanier, City of Ocala; Bob Titterington, City of Belleview; Troy Slattery, City of Dunnellon; Chad Ward, City of Dunnellon.

The letter that was sent on behalf of the TPO from Chairman Curry to FDOT District 5 Secretary John Tyler was provided in the agenda packet. The content of the letter was developed at the February 15 local coordination meeting, and outlined specific comments from the TPO and local government partners regarding the SIS projects lists. The TPO Board ratified the letter at the TPO Board meeting on February 28, 2023.

An overview presentation of SIS projects in Marion County shared by FDOT staff at the February 8 virtual meeting was provided in the agenda packet for the committee to view.

Chairman Odom inquired about East SR 40.

Mr. Balmes said the project was currently in the 2030.

Chairman Odom and gave a comment that the project had been 25 years in the making and should not have been pushed out.

**5c. 2023 MPOAC Freight Priorities Program (FPP)**

Mr. Balmes said the Florida Metropolitan Planning Organization Advisory Council (MPOAC) Freight and Rail Committee worked annually with the TPO/MPO’s to develop a freight priority project list. In the past, the process has focused exclusively on submission of projects by TPO/MPO’s for projects located on the National Highway Freight Network (NHFN). For Marion County, that included: I-75 (and interchanges); US 27 from I-75 to US 301; and US 301 from SR 200 to Alachua County.

In 2022, the MPOAC Freight and Rail Committee expanded the process to include projects that support freight mobility on the State Highway System (On-System) and Off-System (Local). An emphasis was also placed on truck parking projects. Overall, projects had to already be programmed or underway through at least PD&E and ready to receive federal National Highway Freight Program funding for construction.

Provided to the committee in the agenda packet was the FDOT two-page Call for Projects to further explain the program. The call for projects expansion had taken place with an assumption the freight network in Florida would be extended in the future to potentially include other corridors on the state and local networks.
Discussions were taking place at the national state levels tied to the Bipartisan Infrastructure Law (BIL), calling for a modest increase to the NHFN.

However, as the National Highway Freight Program stands today, funding to projects by FDOT had been invested only on the NHFN. Also provided to the commit was a screenshot of the projects funded in 2022 and 2021.

**Item 6. Comments by FDOT**

Ms. Rakinya Hinson provided a construction report was also provided in the committee meeting agenda packet and reminded the committee that they could view updates on projects by visiting www.cflroads.com.

**Item 7. Comments by TPO Staff**

Mr. Balmes talked about the TPO 101 Board Workshop to be held on March 28 at 1:30pm at the Marion County Board of County Commission Auditorium. The TPO Board Chair, Commissioner Craig Curry, led the organization of a TPO 101 Workshop to focus on the form and function of Metropolitan Planning Organizations, including core work products and responsibilities.

The invitation to attend the workshop was extended to the committee.

**Item 8. Comments by TAC Members**

Mr. Titterington inquired about adding 102nd to the US 441/301 Resurfacing and companion sidewalk and shared trail project plan.

The committee had discussion about the plans for the project.

Ms. Hinson said that she would find out more information on the project and get back to the committee.

**Item 9. Public Comment**

Mr. Steven Neal, with the City of Ocala wanted to know how to access crash information in Marion County.

Mr. Balmes asked for a submitted request of the locations needed for the crash information and said that he would work with Mr. Ji Li on the gathering the information needed.

Also, Mr. Neal mentioned that he heard of possible trucks being parked on SR 200 by 484 and wanted to know if a small portion of parking could be used for micro transit buses and a charging station.

Ms. Hinson said she was not aware of a truck parking area in the location.

Chairman Odom said that the County had parking and stations that could possibly be utilized and told Mr. Neal he could inquire with County.
Item 10. Adjournment

Chairman Kenneth Odom adjourned the meeting at 4:30pm.

Respectfully Submitted By:

RE: Functional Classification Review Process, Florida Department of Transportation (FDOT)

Summary

Every 10 years, after the U.S. Census is completed, updated population numbers determine changes in Urban Boundaries, which are preliminarily adjusted by the Census Bureau. The Federal Highway Administration (FHWA) and Florida Department of Transportation (FDOT) can determine if further refinements should be made for reasons such as consistency with the approach to transportation planning. The Functional Classification of public roadways is updated during the same timeframe as Urban Boundary updates for efficiency. During the August 9, 2022 TAC/CAC meetings, the FDOT District Five presented an overview presentation regarding Functional Classification and Urban Boundary updates. District Five recently developed a web-based application to receive input regarding proposed Functional Classifications and is ready to coordinate the Functional Classification Review Process with the TPO and local agencies.

District Five will summarize the Functional Classification process to date and discuss the schedule to complete the Review Process by early Summer. The TPO Board will ultimately need to approve the updated Functional Classification map, so it will be critical that local agencies are fully engaged in this review. The Urban Boundary Review Process will take place after approval of the Functional Classification map and is expected to begin in late Summer.

RE: Draft 2023 List of Priority Projects (LOPP)

On an annual basis, per State Statute, the TPO works in collaboration with the cities of Belleview, Dunnellon, Ocala, Marion County and the Florida Department of Transportation (FDOT) to develop and submit a 2023 List of Priority Projects (LOPP). This process is undertaken to identify the highest priority projects to receive consideration for federal and state funding through the FDOT Work Program over the next five years.

The LOPP process serves as the key connection between projects identified in the 2045 Long Range Transportation Plan (LRTP) and the Transportation Improvement Program (TIP). Therefore, in order for a project to receive federal and state funding, it must be in the LRTP Cost Feasible or Needs Plan and Boxed Funds Lists.

The initial draft 2023 LOPP project lists are included with this memo. The lists reflect the format and revised procedures adopted by the TPO Board in 2022. Based upon submissions by local partners along with follow up discussions, the following provides a breakdown of the individual lists and total number of projects.

- Top 20 Priorities – 20 of 81 total projects
- Strategic Intermodal System (SIS) – 15 projects
- Non-SIS Capacity – 39 projects
- Safety and Operations – 12 projects
- Trails – 10 projects
- Bicycle/Pedestrian – 6 projects
- Planning Studies – 15 projects

A revised draft LOPP will be presented for final approval at the May 9 joint CAC and TAC meeting. Please plan to attend the April and May meetings to discuss the proposed lists and provide insights, concerns or requests for modifications.

RE: Congestion Management Process, State of System Update

Summary

In November 2021, the TPO Board adopted a revised Congestion Management Plan (CMP). One major element of the CMP is a State of the System. This element contains information related to level of service and congestion for the major federal-aid roadways in Marion County.

The TPO plans to conduct an update to the State of the System element, including level of service information, a comprehensive database table and associated map series. This update has been requested by local government partner agencies in support of ongoing traffic study and impact analysis work performed in the community. This project also involves the development of context classifications for the non-state roadways in Marion County based on the release of the new Quality/Level of Service Handbook in January 2023.

The project is anticipated to begin in early May and be completed by August 31, 2023.

Attachment(s)

- Draft Scope of Work, Consultant Services

If you have any questions regarding the project or draft Scope of Services, please contact me at 438-2631.
Introduction

The TPO desires to have an update to the CMP database and map series related to the automobile level of service and congestion ratings. The update will be based on the most recent published traffic data by the City of Ocala, Marion County, and Florida Department of Transportation (FDOT). The TPO will coordinate with the City of Ocala, Marion County, and FDOT to obtain traffic data for the update.

The FDOT has released a new Quality/Level of Service Handbook in January 2023 with revised service volumes based on context classification. FDOT has developed preliminary context classifications for state roadways that will be utilized for the service volume determination. Context classifications will need to be developed and reviewed with the respective maintaining agencies of the non-state roadways.

Purpose

The purpose of this scope is for Kimley-Horn (Consultant) to support the TPO staff in updating the CMP database and associated map series using the most recent traffic data and generalized service volumes published by FDOT. The CMP database and map series will be utilized by the TPO and agency partners for development and transportation concurrency review.

Scope of Services

Task 1: Project Management and Agency Coordination
Kimley-Horn will perform administrative and agency coordination activities necessary for the performance of this work order. Kimley-Horn will attend a kickoff meeting with TPO staff and agency partners to discuss the project. Kimley-Horn will coordinate with TPO staff as needed throughout the duration of the work order through in-person meetings and conference calls. Kimley-Horn will prepare monthly invoices and progress reports.
Kimley-Horn will participate in one review meeting with TPO staff and agency partners to review the preliminary Context Classification for non-state roadways.

Kimley-Horn will prepare for and lead a presentation to the Technical Advisory Committee, Citizens Advisory Committee, and TPO Board.

**Deliverables**
- Kickoff meeting and minutes
- Agency Context Classification review meeting and minutes
- Monthly Progress Reports and Invoicing
- Presentation to the Technical Advisory Committee
- Presentation to the Citizens Advisory Committee
- Presentation to the TPO Board

**Task 2: Preliminary Context Classification and Service Volume Update**

Kimley-Horn will review the characteristics of roadways within the CMP based on the preliminary context classification for adjacent state roadways and identify a preliminary context classification. Using the context classification, roadway segments may need to be modified for logical transitions in context classification. The preliminary context classifications will be reviewed against the prior year roadway segmentation and area type.

Kimley-Horn will prepare a draft map illustrating the recommended preliminary context classifications. Kimley-Horn will revise the map one time based on input from the respective maintaining agencies, following the coordination meeting outlined in Task 1.

Kimley-Horn will establish daily and peak hour, peak direction service volumes for each roadway within the CMP based on the preliminary context classification, the FDOT 2023 Quality/Level of Service Handbook, and respective agencies Transportation Element of the Comprehensive Plan.

**Deliverables**
- Draft preliminary context classification map
- Final preliminary context classification map

**Task 3: CMP Database and Congestion Map Series**

The TPO will provide the most recent published traffic data from the City of Ocala, Marion County, and FDOT to Kimley-Horn for this task. Kimley-Horn will compare the existing traffic data to the service volumes developed in Task 2. The CMP database will be updated to document existing conditions level of service and volume to maximum service volume (V/MSV) ratios.

The existing traffic data will be extrapolated to a five-year forecast consistent with the current five-year TIP. The five-year forecasted traffic data will be compared to the service
volumes developed in Task 2 to determine the future year level of service and V/MSV ratios.

Congestion ratings will be assigned to each roadway within the CMP for existing and five-year forecasted conditions.

A map series will be prepared summarizing the existing and five-year forecasted LOS, V/MSV, and congestion ratings.

A summary report will be prepared documenting the context classification and service volume development, operating conditions and congestion ratings of the roadways, and a comparison of the congestion ratings to the first-year state of the system evaluation.

One update to the report and CMP database and mapping series will be made based on input from TPO staff and the agency partners.

**Deliverables**

- Draft CMP Database
- Draft Map Series (Existing LOS, Existing V/MSV, 5-year LOS, 5-year V/MSV, Congestion Ratings)
- Draft summary report
- Final CMP Database
- Final Map Series (Existing LOS, Existing V/MSV, 5-year LOS, 5-year V/MSV, Congestion Ratings)
- Final summary report
- Electronic files for the database, map series and report documents

**Time of Completion**

This project is anticipated to be completed within a 4-month period, with final deliverables provided prior to August 31, 2023.

**Project Budget**

The work assignment budget in the attached Table A reflects the lump sum fee estimate for the tasks and specific deliverables outlined in this scope of services. Staff rates are consistent with contract rates included in the Agreement between Kimley-Horn and Marion County for Project RFQ#20Q-121 – General Planning Consultant for TPO dated August 18, 2020 and Modified July 6, 2022.

Invoices will be processed monthly by the Kimley-Horn based on the percent work completed for each task.

RE: Safety Tools Project, Safety Dashboard and Annual Report

Summary
As part of the Commitment to Zero Safety Action Plan, the TPO identified the development of a safety dashboard and annual crash reporting, as a future resource to the public and our partner governments. This concept was shared with the TPO Board and Committees in January, as part of a presentation related to upcoming 2023 planning activities.

The purpose of this project involves the development of an online, interactive safety dashboard mapping tool and annual safety report. Both resources will be developed in a format that is public-friendly for ease of use and navigation. Part of this project is tied to the TPO’s past work involving an annual Trends and Conditions report. The timeframe of the project development will be from May to August 2023, with a formal release of both the online dashboard and annual report in late August.

Some of our neighboring TPO/MPO peers have developed similar tools and reports. Below are three examples from central Florida partner online tools.

Attachment(s)
- Draft Scope of Work, Consultant Support Services

If you have any questions regarding the project or draft Scope of Services, please contact me at 438-2631.
Purpose
The purpose of this task is for Kittelson and Associates (Consultant) to support the TPO by developing an online, interactive Commitment to Zero safety dashboard mapping tool and Annual Safety Summary Report. The detailed tasks to be performed in this scope of services are described as follows.

Services
Task 1: Project Management
The TPO Project Manager and Consultant Project Manager will lead this task. The following tasks will be completed as part of this scope:

- Management of task, invoices and deliverables
- Coordination between the TPO Project Manager and Consultant Project Manager to maintain schedule, deliverables and participation in virtual conference call meetings.

Commitment to Zero Safety Dashboard
Task 2: Create Online Interactive GIS-Based Safety Dashboard
The Consultant will lead this task to design and develop a public-friendly, GIS-based online interactive Commitment to Zero Safety Dashboard to include crash data information over the most current five-year time period in Marion County. The following summarizes the main features of the dashboard.

- Most recent 5-year period of crashes (2018 to 2022) in Marion County
- Color coded by Fatalities, Serious Injuries, Property Damage Only (PDO)
- Zoom feature that can convert from points (zoomed in) to heat (zoomed out)
- Summary dashboard information with total number of crashes, total number of fatalities and total number of injuries – over the current five-year period
- Pie charts summarizing manner of crash, severity of crashes
- Bar chart of crashes per year
- Map pop-up configuration displaying crash statistics for each crash point
- Dashboard will be set up to be updated annually by TPO staff, as new fifth year of crash data is available
- “How-to” guidance documentation for staff to update annually
Data Source(s)
The most current available crash data from 2018 to 2022 will be derived from Signal Four Analytics, University of Florida.

Software Platform
ArcGIS Pro and ArcOnline will be used as the tools. The Consultant will access the TPO’s ArcGIS online hub to create and develop the dashboard. This will enable TPO staff to manage and maintain the hub on an annual basis.

Commitment to Zero Annual Safety Summary Report

Task 3: Develop Annual Safety Summary Report
The Consultant will design and develop a public-friendly, annual safety report summarizing crash statistics over the most recent five-year period (2018 to 2022). The report will be a resource for citizens, elected leaders and public agencies in Marion County. This project will revise and expand upon past annual efforts by the TPO reflected in the Trends and Conditions reports. The draft and final summary reports will be developed in Microsoft Word and Adobe Acrobat (PDF).

The following outlines the main crash statistics to be summarized in the report, as available. The information will be summarized for yearly and five-year totals.

- PM1 Safety Performance Measures Annual Summary and Targets
- Total crashes
- Crash rate (per 100 million VMT)
- Total fatalities
- Fatality rate (per 100 million VMT)
- Serious Injuries
- Serious Injury rate (per 100 million VMT)
- Non-Motorized crashes, fatalities, serious injuries
  - Bicyclists
  - Pedestrians
- Non-Motorized crash, fatality, serious injury rates (per 100 million VMT)
  - Bicyclists
  - Pedestrians
- Crashes by Month
  - Total crashes
  - Fatalities
  - Serious Injuries
- Top 5 overall crash types
- Top 3 fatal crash types
- Top 3 serious injury crash types
- Fatal and serious injury crash summary
  - Age group
  - Road type
• Intersection vs Non-Intersection
• Hit and Run
• Lighting condition
• Weather condition
• Road condition
• Alcohol confirmed
• Drug confirmed
• Seatbelt
• Posted Speed
• Vehicle Type

**Data Source(s)**
The most current available crash data from 2018 to 2022 will be derived from Signal Four Analytics, University of Florida.

**Responsibilities of the TPO**
TPO staff will perform the following tasks:
- Task #1 – Project Management
- Task #2, #3 – Provide files and information, review of draft and final deliverables

**Responsibilities of the Consultant**
Consultant will perform the following tasks:
- Task #1 – Project Management
- Task #2, #3 – Completion of all activities involving the design and development of the interactive GIS safety dashboard and summary annual report

**Time of Completion**
The project will begin on May 5, 2023 and be completed by August 31, 2023. Any changes that are made to the project schedule will be agreed upon by both parties, including the Consultant and TPO staff.

**Deliverables to be provided by the Consultant**
The following final deliverables are expected:
- Interactive online GIS Commitment to Zero Safety Dashboard
- Annual Commitment to Zero Safety Summary Report
- “How-to” guidance documentation for staff to update annually
- All GIS, Word and PDF project files
