Shirley Conroy Rural Area Capital Assistance Grant Application Forms Form Rev. February 2, 2018
Describe the Capital Equipment Requested:
Marion Transit is requesting the replacement of two 24’ paratransit buses. These buses will be equipped with a lift and wheelchair positions with a maximum ambulatory seating arrangement of 12 passengers and two wheelchair positions.

Explain Why the Equipment is Needed:
In order to maintain our fleet with safe, reliable and efficient buses it is imperative that we replace older buses with new ones. Currently we have a fleet of 41 buses with 30 to 32 buses in-service working a daily schedule, Monday - Friday serving the Transportation Disadvantaged throughout the rural areas of Marion County. Our individual buses average over 20,000 miles per year with several that average over 30,000 miles due to the size of Marion County, 1,652 square miles.

If approved, these two new buses will replace two older buses purchased in 2006 and 2007 respectively which have been recently used as spares. The new buses would be put into full-time service so that other older/high-milage buses can be placed in as spare buses.

Identify Local Match Required and Source for Match:
Matching funds will come from funds already approved by the local Board of County Commissioners for FY2017-2018.

Describe the Procurement Process and Timeline:
Buses will be ordered following the TRIPS process as soon as the Shirley Conroy grant is approved. Timeline is expected to take several months however, it is expected that the whole process should not take longer than 3 - 4 months. Funds would be expended before the June 30, 2019 deadline.

Once received, the buses will be put in service immediately.
Project Description and Estimated Cost:

- Capital equipment - **Prioritize based on need.**
- If vehicle, specify type of vehicle.
- Include a copy of the TRIPS vehicle order form used to determine price or quote received for other capital equipment to document cost.

Findings:
Call Hold Time is currently. New RouteMatch software modules will allow for automated booking in the near future which will allow for near elimination of hold times unless the clients specifically wish to correspond with an operator/dispatcher.

MTS strives to keep Roadcalls to an absolute minimum by adhering to a strict maintenance schedule for all vehicles.

Complaints are handled on an individual basis as they arise. Serious consideration is given to any and all complaints and each one is resolved as efficiently and expeditiously as possible.

Review the owner's manual, check the stickers, or ask the driver the following:

  X The lift must have a weight limit of at least 600 pounds.
  X The lift must be equipped with an emergency back-up system (in case of loss of power to vehicle). Is the pole present?
  X The lift must be “interlocked” with the brakes, transmission, or the door, so the lift will not move unless the interlock is engaged. Ensure the interlock is working correctly.

  X Sufficient lighting shall be provided in the step well or doorway next to the driver, and illuminate the street surface around the lift, the lighting should activate when the door/lift is in motion. Turn light switch on, to ensure lighting is working properly.

Once the lift is on the ground, review the following:

  X Must have an inner barrier to prevent the mobility aid from rolling off the side closest to the vehicle until the platform is fully raised.
  X Side barriers must be at least 1 ½ inches high.
  X The outer barrier must be sufficient to prevent a wheelchair from riding over it.
  X The platform must be slip-resistant.

## Level of Availability (Coordination)
### Worksheet 3

### Planning – What are the coordinated plans for transporting the TD population?

*Coordinated plans are organized between Marion Transit Services and the LCB.*

### Public Information – How is public information distributed about transportation services in the community?

*Multiple print news sources (Ocala Star Banner, Riverland News, South Marion Citizen, etc.) and brochure distributions are utilized.*

### Certification – How are individual certifications and registrations coordinated for local TD transportation services?

*Applicants must be disabled, impoverished and/or have no other transportation alternatives.*

### Eligibility Records – What system is used to coordinate which individuals are eligible for special transportation services in the community?

*The LCB determines eligibility according the TD Commission guidelines.*

### Call Intake – To what extent is transportation coordinated to ensure that a user can reach a Reservationist on the first call?

*Three reservationists are on schedule and they are typically enough to handle the volume of reservation calls at any given time. In the event that it is necessary for a client to wait to speak to a reservationist, the phone system allows for ‘Parking’ any hold calls and they are attended to as quickly as possible.*

### Reservations – What is the reservation process? How is the duplication of a reservation prevented?

*Call reservationists document the trip and it is entered into the trip database and the RouteMatch scheduling module prevents duplication.*

### Trip Allocation – How is the allocation of trip requests to providers coordinated?

*N/A No providers are utilized at this time.*

### Scheduling – How is the trip assignment to vehicles coordinated?

*A scheduler utilizing the RouteMatch software system is able to allocate trips accordingly.*

### Transport – How are the actual transportation services and modes of transportation coordinated?

*A scheduler utilizes the RouteMatch software system to allocate trips according to trip type and by time of day.*

### Dispatching – How is the real time communication and direction of drivers coordinated?

*Two-way communicators and the RouteMatch software tablets located on each transport vehicle.*
General Service Monitoring – How is the overseeing of transportation operators coordinated?

Hierarchal Management. The Director oversees managers and the managers oversee the operators.

Daily Service Monitoring – How are real-time resolutions to trip problems coordinated?

MTS dispatchers utilize the RouteMatch software system in order to coordinate real-time anomalies as they occur. The system allows the dispatchers to identify nearby drivers available to lend assistance for additional pick-ups in these instances.

Trip Reconciliation – How is the confirmation of official trips coordinated?

A volunteer is currently being utilized to make calls to clients in order to remind and confirm the upcoming trip. A new RouteMatch software module will be activated in the Spring of 2018 that will automatically call clients utilizing an automated message appropriate to the trip type.

Billing – How is the process for requesting and processing fares, payments, and reimbursements coordinated?

The Trips Manager coordinates all payment methods and coordinates with the clients to ensure that they are fully aware of any and all financial obligations that are relevant to their individual trip types.

Reporting – How is operating information reported, compiled, and examined?

All reports are compiled according to CTD guidelines and submitted based on established deadlines.

N/A. No additional operators are utilized in the system.

Information Resources – How is information shared with other organizations to ensure smooth service provision and increased service provision?
