### **Item 3B. Safety Targets**

Mr. Schauerte presented and said that the Performance Management was a strategic approach to connect investment and policy decisions to help achieve performance goals. Performance measures were used to evaluate progress. Performance measure targets were the benchmarks against which collected data was gauged. The Moving Ahead for Progress in the 21st Century Act (MAP-21) required State DOTs and TPOs/MPOs to conduct performance-based planning by tracking performance measures and setting data-driven targets to improve the measures.

Every year, the Ocala Marion TPO was required to update its targets for the five Safety performance measures established under MAP-21. The TPO had to submit its Safety targets at the end of February 2021.

#### **Safety Performance Measures Description**

1. Fatalities- Total number of fatalities in a motor vehicle crash

2. Fatalities (Rate) - Total number of fatalities per 100 Million VMT (Vehicle Miles Traveled)\*
3. Serious Injuries- Total number of serious injuries in a motor vehicle crash
4. Serious Injuries (Rate) - Total number of serious injuries per 100 Million VMT (Vehicle Miles Traveled)\*
5. Non-Motorized Fatalities & Serious Injuries- Combined number of non-motorized fatalities and non-motorized serious injuries involving a motor vehicle.

When updating its Safety targets, the Ocala Marion TPO was provided the option to either:

1. Adopt the targets established by FDOT, or,
2. Develop its own quantifiable safety performance targets.

In 2020, the TPO voted to develop its own quantifiable safety performance targets, which were based on previous 5-year rolling averages.

TPO staff recommended that the committees support the recommendation of the 2021 Safety Targets, as shown in the table provided in the meeting packet.

An explanation of the methodologies used to develop the 2021 Safety Targets, as well as the past 2019 Safety Targets and 2020 Safety Targets methodologies, had been provided to the committee.

The last significant development of the CMP was in 2011, which had included CMP Policy and Procedures and State of the System reports. In 2021, the TPO planned to develop one revised comprehensive Congestion Management Plan (CMP).

The CMP would outline a systematic approach for identifying and managing congestion on the major federal-aid roadway network within Marion County. That would include an assessment of current and projected traffic conditions, identification of congestion hot spots, recommended strategies and solutions to improve congestion, and planning level guidance for the top congested locations.

The process for developing the CMP would be a collaborative approach involving input and guidance from the technical staff members of the cities of Belleview, Dunnellon and Ocala, Marion County and the Florida Department of Transportation (FDOT). The TPO had planned for both the Technical and Citizens committees and TPO Board would be involved throughout the process to review information, draft documents and offer feedback.
