Item 3b. Intelligent Transportation Systems FDOT Grant

In July of 2018, The TPO approved the Intelligent Transportation Systems (ITS) Strategic Plan Update. The projects developed contributed to a safe and efficient transportation system for the City and County by addressing pressing operational needs identified in the study, as well as planning for specific needs for the next five years, and general needs for the 5 to 10 year timeframe.

While ITS equipment needs in specific corridors was included in the scope, the primary focus of the grant is to provide additional staff for the City and County Transportation Management Centers (TMCs). Stakeholder meetings conducted during the Master Plan update consistently identified lack of proper staffing as one of the major factors contributing to the ineffectiveness of the region's traffic management system. As a result, as part of the Master Plan Update, appropriate staffing levels for the TMCs were included in the recommendations and will be the primary use for the ITS Operational Support Grant, from FDOT (FM #436361-1) which will be available for use in FY 2021.
