CHAPTER 5. TRANSPORTATION NEEDS ASSESSMENT

TABLE 5.3: TRANSIT IMPROVEMENTS

TRANSIT ROUTE	PROJECT DESCRIPTION	YEAR	FUNDING
Existing Maintenance Facility Expansion	Add a new electric bus maintenance facility	2025-2026	Funded
Bellevue Route	Add a new fixed-route service from health Department to Bellevue	2026	Unfunded
Green Route Improvement	Improve peak-hour frequency to 45 mins	2027	Partially Funded
Blue Route Improvement	Improve peak-hour frequency to 45 mins	2027	Partially Funded
Purple Route Improvement	Improve peak-hour frequency to 45 mins	2027	Partially Funded
Orange Route Improvement	Improve peak-hour frequency to 45 mins	2027	Partially Funded
Sunday Microtransit	Implement new microtransit service to serve SunTran core service area	2027	Partially Funded
NorthWest Microtransit	Implement new microtransit service to serve Northwest of City of Ocala	2027	Partially Funded
Silver Routes A & B	Reorganize the existing Silver Route and Silver Express to form Silver A and B routes	2027	Unfunded
SR-200 Fixed Route 1 & 2	Two new fixed-route service connecting Marion Oaks and Southwest SR-200 Areas	2028	Partially Funded
Southwest Microtransit (North, Central, and South)	Implement new microtransit services to serve Southwest SR-200 areas	2028	Partially Funded
Silver Springs Shores Microtransit	Implement new microtransit service to serve Silver Springs Shores area	2028	Partially Funded
Bellevue Microtransit	Implement new microtransit service to serve Bellevue area	2028	Partially Funded
Red Route Modification	Modify the red route in conjunction with the impelmentation of Silver Springs Shores Microtransit	2028	Funded
Teal Route	Implement a new fixed route to connect Silver Springs Shores Walmart to Bellevue	2029	Unfunded

FIGURE 5.19: TRANSIT NEEDS

Changes in Red

CHAPTER 7. FUNDING THE PLAN

Cost Feasible Plan

The culmination of the LRTP planning process is a Cost Feasible Plan (CFP) of multimodal improvement needs that address local needs, desires, and priorities based on public and stakeholder input; a performance-based needs assessment analysis; and revenue expected to be available in the future. The TPO's commitment to multi-faceted investment strategy that does not rely solely on traditional roadway capacity improvements is reflected in the package of improvements in the CFP.

The 2045 CFP also adheres to the federal requirement to practice performance-based planning through the analysis and prioritization of goal-specific data to estimate the need for infrastructure improvements as well as the impacts and benefits of the identified needs.

The CFP is structured in 5- and 10-year time bands, each of which is represented in year of expenditure dollars, inflated using rates prepared by the Florida Department of Transportation (FDOT). The first time band (2021-2025) includes improvements that have been programmed in the FDOT Work Program and the TPO Transportation Improvement Program. The remaining time bands include projects that were identified, prioritized, and included in respective bands based on project cost estimates and revenue forecasts, for which specific improvements are eligible.

Sixteen percent of the non-SIS projected revenue available for infrastructure improvements is allocated to three boxed fund categories of improvements in the 2026-2045 period. The three boxed fund programs include Intelligent Transportation System (ITS) projects, multimodal projects, and corridor studies. The remainder of the projected revenues are allocated to specific roadway projects, including both capacity and operational roadway improvements. Eighty-four percent of non-SIS revenues were allocated to state and local roadway improvements and the remaining sixteen percent to boxed funds programs. The Other Roads & ROW revenue program is a State/Federal funding source, but in non-Transportation Management Area regions, up to fifteen percent of the Other Roads revenues may be allocated to non-state facilities. In the 2045 CFP, twelve percent of this program funding was used to include four roadway improvement projects on non-state roadways, including:

Roadway Capacity and Operational Improvements

The Cost Feasible Plan includes almost 120 centerline miles of roadway capacity improvements, including widening existing roads and new roadway segments. It also includes thirteen intersection improvements, including one new interchange at I-75 and NW 49th St, two existing interchange improvements at US 27 and CR 484, and nine intersection improvements in various locations across the County. The total cost of non-SIS roadway improvements in the Cost Feasible Plan is \$940.5 million, including the improvements funded in the first five years between 2021 and 2025. The prioritized roadway improvements included in the outer years of the Cost Feasible Plan are listed and mapped on the following pages by five-year timeband.

6% ITS

10% Multimodal

0.3% Corridor Studies

82% Roadway Capacity

2% Roadway Operational

Projects in Environmental Justice Areas

A summary of planned investments within Environmental Justice (EJ) areas provides an equity assessment of the Cost Feasible Plan. EJ is defined by the USEPA as the *fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies*. The achievement of environmental justice, then, is measured in two ways:

- The degree to which different segments of the population are protected from environmental hazards and
- The level of access people have to the decision-making process.

Both measures of EJ are addressed in the 2045 LRTP. The first is addressed through a EJ measure applied in the project evaluation and prioritization process, assessing projects in terms of their proximity to transportation disadvantaged populations, also referred to as EJ population. This metric is described in the previous section. The

second measure is addressed through the LRTP public involvement process, as described in **Chapter 3**. In both cases, the defining characteristic is the location of EJ population. The identification of this segment of the Marion County population was accomplished through the analysis US Census data on minority and low income population levels.

The two criteria used to identify EJ population are poverty and minority. The countywide average poverty rate in Marion County is 17.6% and the minority rate is 17.8%, in accordance with the Census data. Areas in the County with both a poverty and minority rate above the countywide averages, respectively, were considered EJ areas for the purpose of the LRTP analysis. A minimum population threshold was also applied to isolate areas with substantial population. The threshold for both minority and poverty is a minimum of 500. Areas meeting either the minority or poverty definition were also considered, particularly in the identification of workshop locations to provide adequate access to the planning process to those people. **TABLE 7.1** summarizes the cost feasible and unfunded needs projects in EJ versus non-EJ areas. Only the portions of projects in Environmental Justice areas are included in the cost/mileage summaries in the EJ Areas column. As indicated in the table, 16% of non-motorized and 26% of motorized projects in the Cost Feasible Plan are located in EJ areas, indicating a proportional distribution of investments, as measured by population distribution in EJ versus non-EJ areas.

TABLE 7.1: INVESTMENTS IN ENVIRONMENTAL JUSTICE AREAS

	EJ AREAS	NON-EJ AREAS	TOTAL
Population	62,300	270,900	333,200
Cost Feasible Roadway Projects	\$132,930,000	\$384,378,000	\$517,308,000
Per Capita	\$2,134	\$1,419	\$1,553
Unfunded Roadway Needs	\$61,326,000	\$862,915,000	\$924,241,000
Per Capita	\$984	\$3,185	\$2,774
ITS Improvements Mileage	49.1	169.7	218.9
Per thousand residents	0.79	0.63	0.66
Multimodal Improvements Total Mileage	84	431	515
Multimodal Improvements Total per thousand residents	1.34	1.59	1.55
Sidewalk Mileage	12	60	72
Bicycle Lane Mileage	22	159	181
Trail Mileage	49	213	262

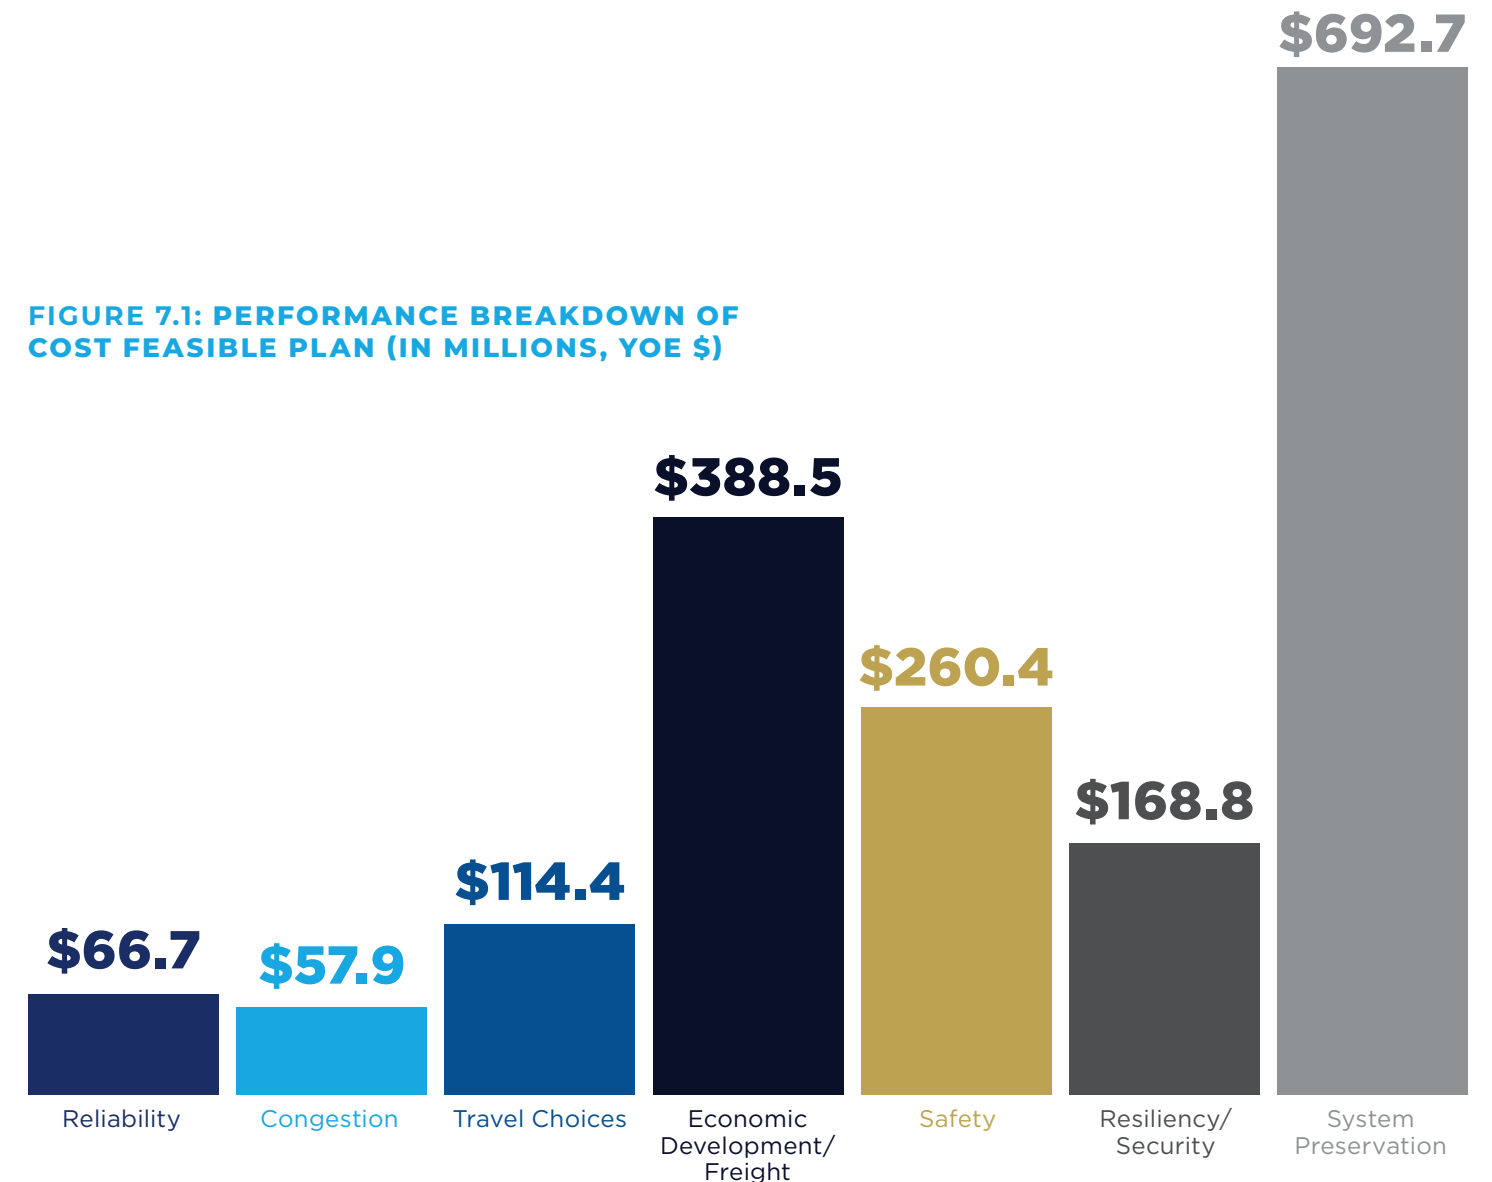

Note: Project cost estimates are represented in present day cost. Multimodal and ITS improvements represent all candidate projects in boxed fund programs.

Projects by Performance Category

Projects are also categorized in accordance with the data-based analysis described in **Chapter 5**. The performance categories assigned to projects include the primary, and in some cases primary and secondary performance groupings. While the distinction of performance category for any transportation infrastructure improvement is not necessarily exclusive of other categories, this assignment is intended to illustrate the main drivers of the multi variable project evaluation process by roadway segment. For example, safety is a primary consideration in any infrastructure improvement, but for some, based on crash history, safety is the primary driver of the improvement need.

The categories used for the Cost Feasible Plan summary illustrated in **FIGURE 7.1** include Reliability, Congestion, and Safety, which represent the first three federally required performance monitoring measures and targets described in **Appendix F**. The reliability allocation represented in **FIGURE 7.1** reflects both projects outlined in the Cost Feasible Plan by five-year timeband as well as the ITS boxed fund program allocation. Likewise, the Travel Choices category includes the Multimodal boxed fund program allocation. Other categories used in this summary include Economic Development/Freight, and Resiliency/Security. The latter category includes improvements identified on congested evacuation corridors, which are categorized as Resiliency due to their importance to facilitate an evacuation response to natural disasters, and as Security due to the role these facilities play ensuring the security of Marion County residents in the face of such a natural disaster.

FIGURE 7.1: PERFORMANCE BREAKDOWN OF COST FEASIBLE PLAN (IN MILLIONS, YOY \$)

Note: Cost allocations do not sum to the Cost Feasible Plan total, as some project costs are reflected in more than one category.

FIGURE 7.2: 2021-2025 PROJECTS

TABLE 7.2: 2021-2025 PROJECTS

PROJECT TYPE	FACILITY	FROM	TO	IMPROVEMENT
State/Federal Funded Roadway Investments	SR 45 (US 41)	SW 110TH St	N of SR 40	Add Lanes & Reconstruct

Boxed Fund Projects

The Corridor Studies, ITS, and Multimodal boxed funds programs include more than 200 projects identified through the system needs assessment described in **Chapter 5**, the 2018 ITS Strategic Plan, and the TPO's bicycle, pedestrian, and regional trails plans reviewed in the Plan Synthesis, respectively. The boxed funds projects are listed in the following tables and illustrated on respective maps.

Cost Feasible Plan Balance Table

The cost / revenue balance of the cost feasible plan, as required by U.S. Code of Federal Regulation (23 CFR 450.324), is demonstrated in **TABLE 7.13**. The Balance columns in the table include cost subtracted from revenue for each timeband and for the plan period as a whole. In cases where the balance is negative, it is by no more than 10 percent, per FDOT guidance in the Revenue Forecasting Guidebook (2018).

(Totals may not sum due to rounding)

¹ First five years revenue is equal to cost of programmed improvements. ² Revenue categories include only those represented in cost feasible plan. ³ Balance reflects Revenue minus Cost. In cases where it is negative, the difference is less than 10%, per FDOT guidance. ⁴ Other Roads revenue estimates include additional 22% of FDOT revenue estimate for product support per FDOT Revenue Handbook.

System Operation and Maintenance

Preservation of the existing transportation infrastructure in Marion County is a top priority, as specified by the LRTP goal to Optimize and Preserve Existing Infrastructure, which is the most heavily weighted LRTP goal. The estimated costs of operating and maintaining existing and planned County roadways, SunTran public transit system, and State Highway System (SHS) in Marion County are reflected in **TABLE 7.14** and, in the case of County roadways and transit, are subtracted from available revenues prior to considering other improvements to the network. In the case of the SHS, the figures represent districtwide estimates for FDOT, District Five.

TABLE 7.14: SYSTEM OPERATION & MAINTENANCE - (COSTS IN 000'S YOY \$)

**Districtwide estimate for FDOT District 5

Corridor Summaries

The primary travel corridors in Marion County include one limited access facility and a number of principal and major arterial roadways that connect the major activity centers within the County and to the broader region outside the County. Twelve corridors were identified based on their levels of traffic, functional classification, and identified improvement needs. These corridors include:

- SR 200
- SR 40
- US 41
- I-75
- SR 464
- US 27 (west of I-75)
- US 301/US 441/US 27
- SR 492
- SR 326
- SR 35
- CR 484
- CR 25/25A

There are multiple improvement needs on all these corridors, including roadway capacity, roadway operational improvements, technological improvements, and multimodal projects. The corridor summaries on the following pages include a comprehensive accounting of needed improvements, including cost feasible, boxed fund, and unfunded improvements on these corridors. The variety of improvement needs for any given corridor can represent opportunities to advance multiple types of corridor improvements during the project development process, potentially achieving economy of scale. The corridor summaries are intended to provide a comprehensive needs assessment by corridor and a resource to implementing agencies to take advantage of the potential economies of scale or, at a minimum, to prevent preclusion of certain improvements during the implementation of others. While not all improvements on the summaries are cost feasible, indeed for some corridors there no cost feasible improvements apart from boxed fund projects, they provide an important reference to potential improvements. In some cases, the summaries include improvements on intersecting facilities, particularly with respect to sidewalk or bicycle facility needs, as they can inform the context and needs of connecting facilities during project development phases.

The summaries are specific to the identified corridors and do not include all projects in the LRTP Needs Plan, nor do they include all projects in the Cost Feasible Plan. They include only the primary corridors and respective improvement needs.

CORRIDOR SUMMARIES

SR 200

SR 200 is a key north/south arterial connecting the growing suburban area in southwest Marion County with downtown Ocala. There are several major activity centers on this corridor, including the College of Central Florida, and one of the largest growth rates in the County, in terms of both population and employment. Improvements identified in this corridor include bicycle and sidewalk infrastructure, ITS infrastructure, and new transit service providing a mobility alternative on this congested corridor.

SR 40

SR 40 is the primary east/west arterial extending the entire distance between the Lake County line to the east and the Citrus County line to the west and intersecting the center of downtown Ocala. The portion of SR 40 east of SR 326 is a Strategic Intermodal System (SIS) facility, with a roadway widening project in the SIS cost feasible plan. The portion to the west is also planned for roadway widenings. There are also bicycle, sidewalk, trail, ITS, and transit improvements needed in this important corridor.

Interstate 75

Interstate 75 is the primary north south artery in Marion County, serving regional and inter-regional travel. As a Strategic Intermodal System (SIS) facility, improvements on I-75 are planned by FDOT. Projects on I-75 in the LRTP include widenings, managed lanes, and interchange improvements, including one new interchange at NW 49th St and modification of the interchange at US 27. Other needed improvements in this corridor include ITS infrastructure on parallel routes and new express bus service connecting the south part of Marion County with downtown Ocala.

SR 464

SR 464 is north/south roadway connecting Silver Springs Shores and Ocklawaha in southeast Marion County to downtown Ocala. The area near Oak Rd was also identified as a freight activity center and the potential for freight movement related infrastructure improvements. Other needs identified in this corridor include multiple bicycle, sidewalk, and trail projects on SR 464 and intersecting roadways. ITS infrastructure improvements and frequency improvements to the existing Blue and Red bus routes are also needed.

SR 301/US 441/US 27

The US 441/US301/US27 corridor extends from the southeast corner of the County to the Alachua County line to the north, bisecting downtown Ocala. It is a regionally significant corridor connecting Lady Lake in Lake County with Belleview, Ocala, and Gainesville to the north. Extensive infrastructure needs were identified on the corridor, consisting of two roadway widening projects on the south end and many sidewalk and trail improvements on intersecting roadways. ITS infrastructure and transit service improvement were also identified providing service between Belleview and Ocala.

SR 326

SR 326 provides a bypass route connecting SR 40 to the east with US 441 and I-75 on the west side of Ocala. The roadway is a Strategic Intermodal System (SIS) facility and is currently scheduled for widening in the outer years of the SIS cost feasible plan. Widening of the non-SIS portion of the roadway west of I-75 is also included in the needs plan, as well as a sidewalk improvement on an intersecting roadway in that segment.

CR 484

CR 484 is the primary east/west roadway in south Marion County. This corridor connects Belleview to Marion Oaks to the west and extends to Dunnellon in the southwest corner of the County. This is a critical corridor with significant single family residential growth in Marion Oaks, as well as a planned distribution center development at the Florida Crossroads Commerce Park near Marion Oaks. Identified needs include roadway widenings; sidewalk, trail, and bicycle lane improvements; and ITS infrastructure improvements. The system needs assessment evaluation identified traffic congestion and safety as key issues in this corridor.

Ocala Marion 2035 Bicycle & Pedestrian Master Plan

Unfunded Projects

Resources available to address infrastructure improvement needs are rarely sufficient to implement all identified projects. There are a number of improvements that remain unfunded, in the context of the LRTP and the Cost Feasible Plan. Unfunded needs include mostly roadway capacity improvements, interchange improvements, and transit service improvements identified in the Needs Plan. A list of unfunded needs is presented in **TABLE 7.15** and **FIGURE 7.9**.

TABLE 7.15: UNFUNDED PROJECTS

PROJECT TYPE	FACILITY	FROM	TO	PROJECT DESCRIPTION
Roadway Projects	I-75 (Interchange)	SR 40		Upgrade interchange
	Marion Oaks Manor Ext	Overpass at I-75		Grade separation
	SW 20th St	Interchange at I-75		New interchange
	W Pennsylvania Ave	Cedar St	US 41	Intersection geometry
	SR 40	US 41	SW 140th Avenue	Widen to 4 lanes
	US 301	CR 42	SE 143rd Place	Widen to 6 lanes
	SW 49th Ave	SW 95th Street	Marion Oaks Trail	Widen to 4 lanes
	CR 484	SW 49th Avenue	SW 20th Avenue Road	Widen to 6 lanes
	CR 484	SW 20th Avenue Road	CR 475A	Widen to 6 lanes
	NW 49th Street	NW 70th Avenue	1.1 mile west of NW 44th Avenue	New 2 lane
	NW 60th Avenue	US 27	NW 49th Street	New 2 lane
	US 441	Sumter County Line	CR 42	Widen to 6 lanes
	Dunnellon Bypass	CR 40	US 41	New 2 lane
	NE 36th Avenue	NE 14th Street	NE 25th Street	Widen to 4 lanes
	NE 36th Avenue	NE 25th Street	NE 35th Street	Widen to 4 lanes
	NE 25th Avenue	NE 14th Street	NE 24th Street	Widen to 4 lanes
	NE 25th Avenue	24th Street	NE 35th Street	Widen to 4 lanes
	CR 25	SR 35	SE 92nd Loop	Widen to 4 lanes
	CR 25	SE 92nd Loop	SE 108th Terrace Rd	Widen to 4 lanes
	SW 20th Street	I-75	SR 200	Widen to 4 lanes
	SE 92nd Place Rd	US 441	SR 35	Widen to 4 lanes
	Lake Weir Avenue	SE 31st Street	SR 464	Widen to 4 lanes
	SE 17th Street	SE 44th Avenue	SE 47th Avenue	New 2 lane
	NE 35th St/NE 60th Ct	NE 36th Avenue	SR 40	Widen to 4 lanes
	Marion Oaks Manor	SW 18th Ave Road	CR 475	New 2 lane
	NW 37th Ave	SR 40	US 27	New 2 lane
	NW 37th Ave	SR 40	US 27	New 2 lane
	SW 40th Ave Realignment	at SR 200		Intersection geometry
	SW 38th St	SW 80th Avenue	SW 60th Avenue	Widen to 4 lanes
	SR 326	CR 200A	NE 36th Avenue	Widen to 4 lanes
	SW 38th St	SW 60th Avenue	SW 43rd Ct	Widen to 4 lanes
	CR 484	Marion Oaks Pass	SR 200	Widen to 4 lanes
	CR 200A Ph 3	NE 35th Street	SR 326	Widen to 4 lanes
	NW 35th Avenue	NW 49th/35th	NW 63rd Street	New 4 lane

PROJECT TYPE	FACILITY	FROM	TO	PROJECT DESCRIPTION
Roadway Projects	CR 42	US 441	CR 25	Widen to 4 lanes
	SW 165th St	Marion Oaks Blvd	Marion Oaks Lane	Widen to 4 lanes
	US 27	NW 44th Avenue	I-75	Widen to 6 lanes
	I-75	CR 318	Marion/Alachua Co Line	Add 4 Special Use Lanes
	I-75	CR 484	CR 318	Add 4 Special Use Lanes
	CR 475A	SW 66th Street	.25 mi south of SW 42nd Street	Widen to 4 lanes
Transit Projects	Green Route			Frequency improvement
	Blue Route			Frequency improvement
	Purple Route			Frequency improvement
	Orange Route			Frequency improvement
	Silver Route A & B			Reorganize existing routes
	Belleview Route			New Fixed-Route Service
	Southwest (SW) Microtransit (North, Central, and South)			New Microtransit Service
	Northwest Microtransit			New Microtransit Service
	Sunday Microtransit			New Microtransit Service
	SR 200 Fixed Route 1 and 2			New Fixed Route Service
	Belleview Microtransit			New Microtransit Service
	Teal Route			New Fixed Route Service
